

HALO IT SERVICES 365

MASTER IMPLEMENTATION SPECIFICATION

FILE 2 OF 5

RMM, Backup Centre, Security Operations Centre, Vault Centre, SLA Management, Client Portal

Version: 1.0

Date: 2026-06-09

Status: Master Requirements Specification

9. RMM CENTRE

Objective

Provide a complete Remote Monitoring and Management platform integrated directly into Halo IT Services 365.

The RMM platform must function as:

- Monitoring Platform
- Device Management Platform
- Remote Support Platform
- Asset Management Platform
- Patch Management Platform
- Automation Platform
- Backup Management Platform

All integrated into a single Halo IT experience.

RMM Agent Architecture

Supported Operating Systems

Microsoft

- Windows 10
- Windows 11
- Windows Server 2016+
- Future Microsoft Releases

Linux

- Ubuntu
- Debian
- CentOS
- Rocky Linux
- RedHat
- Fedora

Apple

- macOS
- iOS
- iPadOS

Additional

- Android
- ChromeOS
- Custom API Integration

Agent Deployment Methods

EXE Installer

Windows deployment package.

MSI Installer

Enterprise deployment package.

Linux Installer

Bash deployment package.

macOS Package

Native Apple installer.

Script Deployment

PowerShell Bash API

Device Monitoring

Health Metrics

Monitor:

- CPU
 - RAM
 - Disk
 - Network
 - Temperature
 - Processes
 - Services
 - Event Logs
-

Device Inventory

Track:

- Manufacturer
 - Model
 - Serial Number
 - Warranty
 - Operating System
 - Installed Applications
 - Hardware Specifications
-

Device Status

States:

- Healthy
 - Warning
 - Critical
 - Offline
 - Maintenance
-

Monitoring Alerts

Generate alerts for:

- Disk Space
 - CPU Usage
 - Memory Usage
 - Offline Devices
 - Failed Services
 - Failed Backups
 - Patch Failures
 - Security Issues
-

Automated Ticket Creation

Alert → Ticket Workflow

Monitoring event automatically:

- Creates Ticket
 - Assigns Team
 - Applies SLA
 - Notifies Relevant Personnel
-

Remote Support

Remote Access

Support:

- Remote Desktop
 - Terminal Access
 - PowerShell
 - Command Prompt
-

Script Execution

Execute:

- PowerShell
 - Bash
 - Python
 - Custom Scripts
-

Patch Management

Monitor:

- Missing Updates
- Critical Updates
- Security Updates

Capabilities:

- Approve
 - Deploy
 - Rollback
-

Software Deployment

Deploy:

- Applications
- Scripts

- Packages
 - Updates
-

Device Policies

Support:

- Compliance Policies
 - Security Policies
 - Patch Policies
 - Software Policies
-

Client Device Tiers

Free

Basic monitoring.

Standard

Monitoring + Alerts.

Professional

Monitoring + RMM + Automation.

Enterprise

Full RMM Platform.

Client Engagement Manager Integration

Every client may have:

- Assigned CEM
- Assigned Engineer
- Assigned Project Manager

Alerts routed accordingly.

Microsoft Integration

Support:

- Microsoft 365
 - Azure
 - Intune
 - Entra ID
-

RMM Audit Logging

Log:

- Commands
 - Connections
 - Changes
 - Scripts
 - Deployments
-

10. BACKUP CENTRE

Objective

Provide centralized backup visibility and management.

Backup Types

Workstation Backup

User Devices.

Server Backup

Physical and Virtual.

Cloud Backup

Cloud Services.

Database Backup

SQL and Application Data.

Halo Platform Backup

Entire Halo System.

Backup Providers

Support:

- OneDrive
 - Google Drive
 - Mega
 - AWS
 - Azure
 - VMware
 - Cove
 - Custom API
-

Backup Monitoring

Track:

- Last Successful Backup
 - Failed Backups
 - Restore Points
 - Backup Size
 - Retention
-

Backup Alerts

Notify:

- Engineers
 - Managers
 - CEM
 - Client Contacts
-

Backup Agent

Installable Agent

Capabilities:

- Backup
 - Monitoring
 - Reporting
 - Encryption
-

Encryption

Requirements:

- AES-256
 - TLS Encryption
 - Secure Key Management
-

Restore Management

Support:

- File Restore
 - Folder Restore
 - Full System Restore
 - Bare Metal Recovery
-

Halo Disaster Recovery

Must support exporting:

- Database
- Files
- Configuration
- AI Configurations
- Integrations

For migration or recovery.

11. SECURITY OPERATIONS CENTRE

Objective

Provide centralized visibility into security posture.

Security Dashboard

Display:

- Security Score
 - Threat Alerts
 - Failed Logins
 - MFA Issues
 - Device Risks
 - Vulnerabilities
-

Security Monitoring

Track:

- Authentication Events
 - Password Issues
 - Suspicious Activity
 - Unauthorized Access
-

Security Scanning

Scan:

- Devices
 - Servers
 - Applications
 - Integrations
-

Vulnerability Management

Track:

- Critical
- High
- Medium
- Low

Issues.

Conditional Access

Support:

- Location Restrictions
 - Device Restrictions
 - Time Restrictions
 - Risk Based Access
-

Security Policies

Manage:

- Password Policies
 - MFA Policies
 - Access Policies
 - Device Policies
-

Threat Detection

Monitor:

- Brute Force
 - Credential Abuse
 - Suspicious Behaviour
 - Privilege Escalation
-

Security Notifications

Notify:

- Security Team
 - Owners
 - Assigned Managers
-

Security AI

Capabilities:

- Threat Analysis
- Recommendations
- Security Summaries

Security AI may assist but must not expose sensitive data externally.

Security Agent

Optional lightweight security module.

Capabilities:

- Basic Malware Detection
 - Security Monitoring
 - Risk Reporting
-

Firewall Integration

Support:

- Sophos
 - WatchGuard
 - Fortinet
 - Cisco
 - pfSense
 - OPNsense
-

Penetration Testing Centre

Features:

- Internal Testing
 - Security Validation
 - Configuration Review
-

New Feature Security Validation

All newly deployed modules must pass:

- Security Scan
- Permission Review
- Dependency Review

Before production activation.

12. VAULT CENTRE

Objective

Provide secure credential and secrets management.

Vault Features

Store:

- Passwords
 - API Keys
 - Certificates
 - Secrets
 - MFA Recovery Codes
-

Encryption

Requirements:

- AES-256
 - Per User Encryption
 - Secure Key Storage
-

Authentication

Support:

- Password
 - MFA
 - TOTP
 - Email Verification
-

User Isolation

Users can only access:

- Their Vault
 - Shared Vaults
 - Authorized Entries
-

Shared Vaults

Support:

- Team Vaults
 - Client Vaults
 - Project Vaults
-

Security Events

Detect:

- Brute Force Attempts
 - Unauthorized Access
 - Suspicious Activity
-

Emergency Lockdown

Capabilities:

- Lock User
 - Wipe Vault Access
 - Notify Security
-

External Vault Integration

Support:

- Bitwarden
 - 1Password
 - Keeper
 - LastPass
 - Dashlane
-

Audit Logging

Track:

- Views
 - Changes
 - Shares
 - Exports
-

13. SLA MANAGEMENT

Objective

Provide complete service level management.

SLA Tiers

Bronze

Basic Support.

Silver

Enhanced Support.

Gold

Priority Support.

Platinum

Advanced Support.

Diamond

Premium Support.

Custom

Tailored SLA.

SLA Metrics

Track:

- Response Time
 - Resolution Time
 - Escalation Time
 - Compliance
-

SLA Automation

AI determines:

- Priority
- Assignment
- Escalation

Based on SLA.

SLA Alerts

Notify:

- Engineers
 - Managers
 - CEM
 - Clients
-

SLA Reports

Generate:

- Client Reports
 - Internal Reports
 - Compliance Reports
-

Contract vs Non-Contract Logic

Contract clients receive priority according to agreement.

Emergency incidents may override standard prioritization rules.

14. CLIENT PORTAL

Objective

Provide a dedicated client experience.

Client Authentication

Features:

- Login
 - MFA
 - Password Reset
 - Identity Verification
-

Client Dashboard

Display:

- Tickets
- Devices
- Alerts
- Quotes

- Invoices
 - Projects
-

Ticket Submission

Allow:

- New Tickets
 - Service Requests
 - Change Requests
-

Client Device View

Display:

- Assigned Devices
- Health Status
- Alerts

According to permissions.

Client Knowledge Base

Access:

- Public KB
 - Company KB
 - Shared Documentation
-

Client Contacts

Support:

- Primary Contact
 - Secondary Contact
 - Department Contacts
-

Client Permissions

Admins may assign:

- View Rights
 - Edit Rights
 - Approval Rights
-

Change Request Approvals

Authorized client contacts can:

- Approve
 - Reject
 - Request Changes
-

Client Notifications

Receive:

- Ticket Updates
 - SLA Updates
 - Invoice Updates
 - Quote Updates
-

Self-Service Features

Support:

- Password Reset Requests
 - Access Requests
 - User Requests
 - Device Requests
-

Client Audit Logging

Log:

- Logins
- Changes
- Approvals
- Requests
